

Digital business

Delivering agility
with scale

Welcome to possible

The age of disruption

Digital disruption has set in. This has had a pervasive effect on enterprises, touching every aspect – from customer interaction, employee collaboration to partner integration. Conventional enterprise strategies and established paradigms have been challenged while evaluating past successes against new 'digital' criteria.

Digital disruption impacts industries and enterprises differently. All enterprises do not fully harness the advantages of a superior customer experience or a reduced time to market. Successful enterprises partner with 'digitalists' to navigate the complex maze of digital strategy, device proliferation and technology choices. This partnership helps them in creating differentiated consumer experiences and puts them on a path of long-term sustainable competitive advantage.

Overview

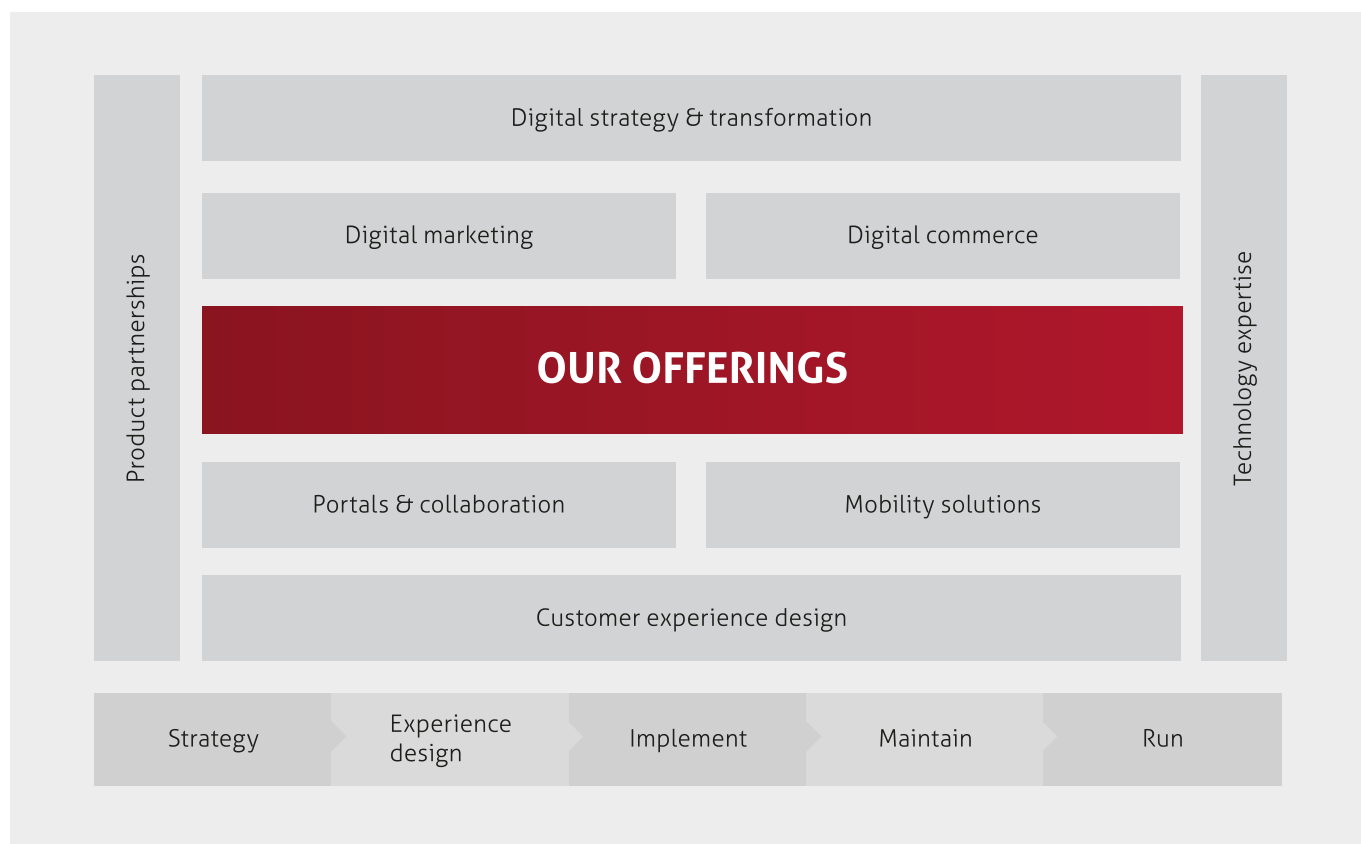

Digital businesses are at a unique confluence of social and technological changes. This has created some of the greatest opportunities and challenges for enterprises. Technologies such as mobile and social media are moving beyond the experimental stages, causing a disruptive impact. This has put every enterprise under pressure to provide a seamless experience for customers across multiple digital touchpoints, using innovative digital solutions.

Enterprises, aimed at customer centricity, have recognized that technology is the tool to drive their businesses: it is the key to long-term success. Thus, digital business is the way forward. Digital marketing, e-commerce, mobility, content and collaboration, Big Data analytics are at the top of every enterprise owner's mind. Enterprises which best utilize these digital capabilities are the ones which go ahead.

In this rapidly evolving environment there is a need today for digital partners who are capable of tackling the dual challenges of speed to market and global scale. Mindtree Digital, with its unique blend of the agility of a creative agency and the scale of a technology services provider, is optimally placed to help enterprises with their digital transformation.

Mindtree service offerings

Mindtree's in-depth knowledge of digital technologies and domain expertise enables us to deliver comprehensive and cost effective digital solutions. Our services range from strategy, assessment, design, implementation, operation and support, assisting enterprises on their digital journey. Our experience design group helps us deliver delightful, intelligent and effective solutions to customers around the world.

Innovation at Digital

Majority of the consumer facing enterprises struggle to develop more than two consumer innovations due to the sheer effort required to roll out such activities. Mindtree's proprietary innovation accelerator framework supports rapid innovation. It has developed a wide array of solutions and accelerator frameworks to help customers harness their digital potential. Solutions developed on this framework range from a consumer engagement platform targeting brand enterprises, to retail solutions using gesture-based technologies. We believe that with a little support, digital innovation in our customer

enterprises can be accelerated significantly.

With this vision in mind, Mindtree has established its digital innovation laboratory, **The Digital Pumpkin**, a space for collaboration, immersion and introspection in transforming our lives through meaningful digital solutions. These solutions are aimed at supporting and accelerating our customer innovation programs in idea selection, primary research, concept detailing, user journey creation, business case creation, functional prototypes and creation of pilotable solutions.

Some of our digital solution offerings include:

Social analytic cell Solution that translates solution chatter to actionable insights by different business groups in an enterprise.	Distributed franchisee collaboration system The Hub and Spoke enterprise collaboration solution, for distributed franchisee businesses.
Multichannel site builder Content management system that helps render multiple variations of websites dynamically.	Consumer engagement and loyalty platform Multichannel consumer engagement and loyalty solution for enterprises.
Next generation unified interface for consumer centric enterprises An interface for enterprises aspiring to keep the focus on consumers by integrating and aggregating complex enterprise systems.	Market scouting solution Solution for scouting different markets for prospective customers through an 'Inspire to Buy' model.
In store flash deals solution In the retail industry, footfall to purchase ratio for several categories like apparels, electronics and department stores is lower than 20%. Our in store flash deals solution uses a gesture recognition technology to improve this conversion rate with a high ROI for the retailer.	Virtual Assistant (VA) VA is a cost effective digital innovation to address the consumer disconnect caused by standard digital solutions.

Our technology partnerships

- Microsoft gold certified partner
- IBM premier business partner
- Liferay partner
- Adobe implementation partner
- Oracle implementation partner
- SAP implementation partner
- SDL Tridion consulting and implementation partner
- Sitecore business partner
- Kony implementation partner
