Mindtree
Welcome to possible

Product reengineering solution for a global web services enterprise.

Mindtree enabled a global web services enterprise to develop and completely reengineer their portal.

Business challenge

			Challenges
High turnaround time	**Rights & clearances:** Tracks and manages rights requests.	**Records retention:** To manage retention policies on the various objects for the enterprise.	Legacy applications / platforms Lack of integration
	Impacted business areas		
Scalability, performance and security issues	**TeamMate:** The product that takes care of the internal auditing.	**Exterro fusion:** The product that manages legal holds on people, matters and so on.	Unavailability of reporting features

Business impact
- 30% increase in productivity
- 90% reduction in licensing cost by the real-time data integration
- Removal of 80% obsolete data
- Highly satisfied customer

Our solution

1. A new solution portal for records and retention was developed from scratch and implemented. It was secured with two factor authentication.
2. A completely reengineered solution for rights and clearances was integrated with interwoven DMS. It is a highly reliable and scalable architecture, with 99.9% availability.
3. Took complete ownership of product implementation by working directly with vendor and customer stakeholder.
4. Enhanced functionalities such as risk assessment, scheduling, planning, execution, review, report generation, trend analysis and audit committee reporting.

Testimonials:
1. 'Consistently met random deadlines, given the tight timelines and the loss of a key analyst (team absorbed). A lot of activity with behind the scenes legal work ensured that the customer is very happy.'
- Sr. Tech Director

2. 'Thank you very much for all your work on this project – it's going to revolutionize the way the rights & clearances responds to requests!'
-Enterprise owner
