From the editor's desk

As travel begins to climb during the holiday season, we're celebrating the launch of Mindtree's new Digital Health Passport for Travel—a one of a kind solution that has enormous potential to boost travel safety and traveler confidence in the new normal. We're also designing and developing solutions to fight financial crimes, increasing our market presence in Australia and New Zealand, focusing on internet of things (IoT) growth in manufacturing and logistics, and working with partners that are creating business impact through productization of services.

Mindtree launches Digital Health Passport for Travel to improve traveler experience

Mindtree's Digital Health Passport for Travel is a comprehensive solution covering **all aspects** of traveling in the new normal—with access to vaccine records on-the-go, nearby COVID-19 test bookings, and real-time travel requirements for your destination of choice (country prerequisites, entry restrictions, quarantine rules, etc.). See how Mindtree's plug-and-play blockchain solution for airlines is making travel seamless and safe for all.

Fighting financial crimes with artificial intelligence and machine learning

Today's world is rapidly embracing digitization—and the need to fight financial crime, money laundering, and terrorist financing is on the rise. In this white paper, read how Mindtree is using cutting-edge technologies like artificial intelligence (AI) and machine learning (ML) to help banks and financial institutions move beyond a mere rules engine and adopt a dynamically adaptive predictive model and/or dynamic workflow engine to detect and report suspicious activity.

Mindtree NxT enhances IoT focus plus growth in Australian and New Zealand markets

We sat down with Informist to talk about how Mindtree plans to strengthen our IoT growth and tap into the Australian and New Zealand markets to deliver industry-leading sales growth. "We acquired a capability through NxT Digital Business (now Mindtree NxT) which is essentially bringing the internet of things and the edge analytics at the operational floor level for our customers, especially in manufacturing and logistics businesses," said Venu Lambu, Mindtree's Executive Director and President of Global Markets.
