Mindtree
A Larsen & Toubro Group Company

API & modernization strategy, governance, and consulting for a leading healthcare products company

Welcome to possible

The Challenges

The customer uses Webmethods integration platform and their current architecture is tightly coupled with presentation layer and services layers, both have business logic and which poses challenges in gaining agility and faster delivery of newer functionalities.

The customer is looking to adopt an API-first strategy for integration with suppliers and other partners. To do this, the client wants to adopt cloud and upgrade their integration landscape to provide loose coupling, scalability, agility and wants a platform that supports hybrid integration.

Our Solution

Mindtree performed an 8 week consulting exercise and provided:

- Integration modernization consulting solution for moving to cloud

- API strategy for the supplier connectivity applications

- Product selection to enable new strategy

- Identified business use cases for API adoption by creating an MVP (Minimum Viable Product) implementation to validate reference architecture and setup API governance model with newer roles and responsibilities

- Implementation plan and budgetary estimates

- Defined API governance model and team structure with roles and responsibilities

The Results

- The customer was able to modernize their architecture in a manner that prevented existing investment, but still enabled new technology benefits

- The customer was able to jump-start their middleware modernization and API initiatives on a best of breed platform

- The customer was able to start small, learn newer ways of working with early feedback and adapt to changes
