A Mindtree Case Study

The challenges

The client embarked on a strategic initiative to build the next generation travel processing platform to receive, process, and ship global trip data to consumers and partners. This needs a modern and scalable architecture leveraging new technologies to meet key NFRs around larger volume and faster response.

Our solution

- Mindtree defined the solution architecture based on next generation technology stack involving APIs, Microservices and integration frameworks and identified the right open source technologies to achieve the client's objectives
- Mindtree owned and governed the overall architecture and program execution of the initiative

The results

The solution delivered the following benefits

- 300% reduction in end-to-end transaction processing time
- 200% reduction in new client onboarding window
- 2X increase in new consumers partnering due to the new API ecosystem and faster onboarding window
- Better B2B integration offerings via APIs to offer core business data to partners
