- (b) enable the combined business to derive benefits by way of creating more opportunity for growth in customer relationships/value creation through enhanced attention to brand building, including the corporate brand, develop stronger relationships across its partner ecosystem, using the augmented intellectual capital and stronger implementation capabilities resulting from the Amalgamation.

Particularly, it gives the combined business the opportunity to consolidate its position in the banking, financial services and insurance (BFSI) vertical, enhance scale in high-growth verticals like high-tech and consumer packaged goods, retail and expand into new verticals (such as travel, transport and hospitality).

APPROACH FOR RECOMMENDATION OF FAIR EQUITY SHARE EXCHANGE RATIO

The Scheme contemplates the merger of Mindtree into LTI. Arriving at the fair equity share exchange ratio for the Proposed Amalgamation of Mindtree into LTI would require determining the relative value of equity shares of Mindtree and LTI. These values are to be determined independently, but on a relative basis for the Valuation Subjects, without considering the effect of the Proposed Amalgamation.

Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for mergers and our reasonable judgment, in an independent and bona fide manner.

The valuation approach adopted by EY and GT is given in Annexure 1A and 1B respectively (Annexure 1A and 1B together referred to as Annexures).

BASIS OF FAIR EQUITY SHARE EXCHANGE RATIO

The fair equity share exchange ratio has been arrived at on the basis of a relative equity valuation of Valuation Subjects based on the various approaches / methods explained in the Annexures and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of the Valuation Subjects, having regard to information base, key underlying assumptions and limitations. Though different values have been arrived at under each of the methodologies as mentioned in the Annexures, for the purposes of recommending a fair equity share exchange ratio it is necessary to arrive at a single value for each of the Valuation Subjects. For this purpose, it is necessary to give appropriate weights to the values arrived at under each methodology.

While we have provided our recommendation of the Fair Equity Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Fair Equity Share Exchange Ratio. The final responsibility for the determination of the exchange ratio at which the Proposed Amalgamation shall take place will be with the Board of Directors of the respective Companies who should take into account other factors such as their own assessment of the Proposed Amalgamation and input of other advisors.

We have independently applied approaches / methods discussed in the Annexures, as considered appropriate, and arrived at the relative value per share of the Companies. To arrive at the consensus on the fair equity share exchange ratio for the Proposed Amalgamation, suitable minor adjustments / rounding off have been done.

Ernst & Young Merchant Banking Services LLP

GT Valuation Advisors Private Limited

Recommendation of fair exchange ratio for the proposed Amalgamation of Mindtree Limited into Larsen & Toubro Infotech Limited

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined hereinabove, we recommend the following fair equity share exchange ratio for the Proposed Amalgamation of Mindtree into LTI:

73 (Seventy three) equity shares of LTI of INR 1/- each fully paid up for every 100 (Hundred) equity shares of Mindtree of INR 10/- each fully paid up.

It should be noted that we have not examined any other matter including economic rationale for the Proposed Amalgamation per se or accounting, legal or tax matters involved in the Proposed Amalgamation.

Annexure 1A- Approach to Valuation – EY

There are primarily three approaches in valuation (viz., Cost/Asset Approach, Market Approach and Income Approach). For any valuation, all the approaches may not be relevant and therefore will not give a fair estimate of value. Hence, the approach most suitable for that specific business / company must be applied in the valuation exercise, based on the experience and common practices adopted by valuers.

According to IVS 104 “Fair Value is the estimated amount for which an asset or liability should exchange on the Valuation Date between a willing buyer and a willing seller in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion”.

We have adapted internationally accepted valuation standards and approaches in delivering our valuation conclusion. There are several principal valuation approaches under International Valuation Standard of which we have considered only those approaches to the extent, it is applicable and relevant.

The various approaches generally adopted in valuation are as under:

1. Cost/Asset Approach: Net Asset Value Method
2. Income Approach: Discounted Cash Flows (DCF) Method
3. Market Approach: Comparable Companies Market Multiple Method, Comparable Transactions Method and Market Price Method

We have used the Market Approach (i.e., Market Price Method and Market Multiples Method) and Income Approach (i.e., DCF method) for valuation of both the Companies

Fair valuation of the Companies factors various intangible assets whether or not recorded in the financials of the respective companies.

Cost/ Asset Approach – Net Asset Value (NAV) method: Under this approach, the net asset value method is considered, which is based on the underlying net assets and liabilities. Cost approach is not considered suitable for IT Companies since it does not capture the earnings potential or value of intangibles in the business. Hence, in the present valuation analysis, we have not considered NAV method.

Ernst & Young Merchant Banking Services LLP

GT Valuation Advisors Private Limited

Recommendation of fair exchange ratio for the proposed Amalgamation of Mindtree Limited into Larsen & Toubro Infotech Limited

Income Approach - Discounted Cash Flow (DCF) method: Under the DCF method the projected free cash flows to the firm are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the firm. Such DCF analysis involves determining the following:

- *Estimating future free cash flows:*

Free cash flows are the cash flows expected to be generated by the company that are available to the providers of the company's capital – both debt and equity.

- *Appropriate discount rate to be applied to cash flows i.e., the cost of capital:*

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

We have used this method for valuation. The financial forecasts have been prepared using publicly available information on the two companies and on the sector, consensus of analyst forecasts as compiled by financial information providers, suitable extrapolations, and other qualitative factors.

Market Approach - Multiples method: Under this method, one attempts to measure the value of the shares / business of a company by applying the derived market multiple based on market quotations of public / listed companies, in an active market, possessing attributes similar to the business of such company - to the relevant financial parameter of the company / business. This valuation is based on the principle that such market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances. In the present valuation analysis, we have considered relative PE multiples for arriving at the value per equity share of the Companies.

Market Approach - Market Price (MP) method: Under this method, the value of shares of a company is determined by taking the average of the market capitalization of the equity shares of such companies as quoted on a recognized stock exchange over reasonable periods of time where such quotations are arising from the shares being regularly and freely traded in an active market, subject to the element of speculative support that may be inbuilt in the market price.

The equity shares of Companies are listed on NSE and BSE and are traded frequently. In these circumstances the share prices observed on NSE over a reasonable period have been considered for arriving at the value per equity share of the Companies under the Market Price method. For arriving at the market price, we have considered prices over appropriate period up to 05 May 2022. We have also considered relative target prices indicated by various analysts tracking the companies and the sector

Fair Valuation:

We have arrived at the fair value of equity shares of both Companies by applying below mentioned weights to the value derived under various methods.

The computation of fair equity share exchange ratio for Amalgamation of Mindtree into LTI by EY is tabulated below:

Valuation Approach	Mindtree (A)		LTI (B)	
	Value per Share of Mindtree (INR)	Weight	Value per Share of LTI (INR)	Weight
Cost/Asset Approach	NA	NA	NA	NA
Income Approach – DCF Method (i)	3,427	33.33%	4,847	33.33%
Market Approach				
Market Price method (ii)	3,638	33.33%	4,935	33.33%
Multiples method (iii)	3,667	33.33%	4,926	33.33%
Relative Value per Share (Weighted Average of (i),(ii) and (iii))	3,577		4,903	
Fair Equity Share Exchange Ratio (A/B) (Rounded)	0.73			

NA = Not Applied / Not Applicable

Annexure 1B- Approach to Valuation - GT

We have given due cognizance to the International Valuation Standards (“IVS”) for the purpose of arriving at the valuation of the Companies. The valuation base considered is Fair Value. The IVS defines Fair Value as the “estimated amount for which an asset or liability should exchange on the Valuation Date between a willing buyer and a willing seller in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion”.

As discussed below, there are several commonly used and accepted methods for carrying out the valuation under the three principal approaches, which have been considered in the present case, to the extent relevant and applicable, including:

- a) Cost/Asset Approach – Net Asset Value Method
- b) Income Approach – Discounted Cash Flow Method
- c) Market Approach:
 - i. Market Price Method
 - ii. Comparable Companies Multiple Method.

Net Asset Value (“NAV”) Method

The asset-based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis. This valuation approach is mainly used in case where the firm is to be liquidated i.e., it does not meet the “going concern” criteria or in case where the assets base dominates earnings capability.

The Scheme of Arrangement would normally be proceeded with, on the assumption that the companies being part of the amalgamation process are going concerns and an actual realization of their operating assets is not contemplated. Hence, we have not considered the NAV method to value the Companies.

Discounted Cash Flow (“DCF”) Method

The DCF method values the asset by discounting the cash flows expected to be generated by the asset for the explicit forecast period and also the perpetuity value (or terminal value) in case of assets with indefinite life.

Using the DCF analysis involves determining the following:

- a) **Estimating future free cash flows:**
Free cash flows are the cash flows expected to be generated by the company that are available to all providers of the company’s capital – both debt and equity.
- b) **Appropriate discount rate to be applied to cash flows i.e., the cost of capital:**
This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

Since the Companies are listed on Stock Exchanges, the information related to future financial performances is price sensitive and not made available to us. We have used the analysts forecast for the two companies available with some of the subscribed databases to determine value under the DCF method for valuation of the Companies.

Market Price ("MP") Method

The market price of an equity share as quoted on stock exchanges is normally considered as the value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares.

The equity shares of Companies are listed on NSE and BSE and are traded frequently. In these circumstances the share prices observed on NSE over a reasonable period have been considered for arriving at the value per equity share of the Companies under the Market Price method. For arriving at the market price, we have considered the volume weighted average price on NSE, over a reasonable period prior to the relevant date as 05 May 2022, the last working day immediately prior to the date of announcement of the Proposed Amalgamation.

Comparable Companies Multiple ("CCM") Method

Under this method, value of the equity shares of a company/ business undertaking is arrived at by using multiples derived from valuations of comparable companies traded on active market. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

In the present valuation analysis, we carried out research on comparable companies for Mindtree and LTI, listed on Indian Stock exchanges and having similar operations. The Select multiples have been applied for determining the value per share of the Companies under this method.

Ladies and Gentlemen:

You have requested our opinion as to the fairness from a financial point of view to the holders (other than Larsen & Toubro Infotech Limited ("LTI") and its subsidiaries) of the fully paid up equity shares of Rs.10 per share (the "Mindtree Equity Shares"), of Mindtree Limited (the "Company") of the exchange ratio of 73 fully paid up equity shares of Re.1 per share (the "LTI Equity Shares"), of LTI for every 100 Mindtree Equity Shares (the "Exchange Ratio") pursuant to the scheme of amalgamation and arrangement amongst LTI, the Company and their respective shareholders and creditors (the "Scheme").

We understand that the Exchange Ratio has been jointly recommended by Ernst & Young Merchant Banking Services LLP, registered valuers appointed by the Company in connection with the Scheme, and GT Valuation Advisors Private Limited, registered valuers appointed by LTI in connection with the Scheme, as set forth in their joint valuation report dated May 6, 2022 (the "Valuation Report").

We have acted as financial advisor to the Company in connection with this opinion and expect to receive fees for our services in connection with this opinion, and the Company has agreed to reimburse certain of our expenses arising, and indemnify us against certain liabilities that may arise, out of our engagement. We may in the future provide financial advisory and/or underwriting services to the Company, LTI and/or L&T and their respective affiliates for which our Investment Banking Division may receive compensation.

In connection with this opinion, we have reviewed, among other things, the Scheme; the Valuation Report; annual reports to shareholders of the Company and LTI for the five fiscal years ended March 31, 2021; quarterly reports to shareholders of the Company and LTI for the 4 quarters ending March 31, 2022; certain publicly available research analyst reports for the Company and LTI; certain internal financial analyses and forecasts for the Company and certain financial analyses and forecasts for LTI and pro forma for the Transaction, in each case, as prepared by the management of the Company and approved for our use by the Company (the "Forecasts"); and certain operating synergies projected by the management of the Company to result from the Transaction, as approved for our use by the Company (the "Synergies"). We have also held discussions with members of the senior management of the Company regarding their assessment of the strategic rationale for, and the potential benefits of, the Transaction and the past and current business operations, financial condition and future prospects of the Company and LTI; reviewed the reported price and trading activity for the Mindtree Equity Shares and the LTI Equity Shares; compared certain financial and stock market information for the Company and LTI with similar information for certain other companies the securities of which are publicly traded; reviewed the financial terms of certain recent business combinations in the information technology industry and in other industries; and performed such other studies and analyses, and considered such other factors, as we deemed appropriate.

For purposes of rendering this opinion, we have, with your consent, relied upon and assumed the accuracy and completeness of all of the financial, legal, regulatory, tax, accounting and other information provided to, discussed with or reviewed by, us, without assuming any responsibility for independent verification thereof. In that regard, we have assumed with your consent that the Forecasts and the Synergies have been reasonably prepared on a basis reflecting the best currently available estimates and judgments of the management of the Company. We have not made an independent evaluation or appraisal of the assets and liabilities (including any contingent, derivative or other off-balance-sheet assets and liabilities) of the Company or LTI or any of their respective subsidiaries and, except for the Valuation Report, we have not been furnished with any such evaluation or appraisal. We have assumed that all governmental, regulatory or other consents and approvals necessary for the consummation of the Transaction will be obtained without any adverse effect on the Company or LTI or on the expected benefits of the Transaction in any way meaningful to our analysis. We have assumed that the Transaction will be consummated on the terms set forth in the Scheme, without the waiver or modification of any term or condition the effect of which would be in any way meaningful to our analysis.

Our opinion does not address the underlying business decision of the Company to engage in the Transaction, or the relative merits of the Transaction as compared to any strategic alternatives that may be available to the Company; nor does it address any legal, regulatory, tax or accounting matters. Further, the Company will remain solely responsible for the commercial assumptions on which this opinion is based and for its decision to proceed with the Transaction. We were not requested to, and we did not, participate in the negotiation of the terms of the Transaction. We were not requested to solicit, and did not solicit, interest from other parties with respect to an acquisition of, or other business combination with, the Company or any other alternative transaction. This opinion addresses only the fairness from a financial point of view to the holders (other than LTI and its subsidiaries) of Mindtree Equity Shares, as of the date hereof, of the Exchange Ratio pursuant to the Scheme. We do not express any view on, and our opinion does not address, any other term or aspect of the Scheme or Transaction or any term or aspect of any other agreement or instrument contemplated by the Scheme or entered into or amended in connection with the Transaction, including, the fairness of the Transaction to, or any consideration received in connection therewith by, the holders of any other class of securities, creditors, or other constituencies of the Company; nor as to the fairness of the amount or nature of any compensation to be paid or payable to any of the officers, directors or employees of the Company or LTI, or class of such persons, in connection with the Transaction, whether relative to the Exchange Ratio

pursuant to the Scheme or otherwise. We are not expressing any opinion as to the prices at which shares of LTI Equity Shares or Mindtree Equity Shares will trade at any time or, as to the potential effects of volatility in the credit, financial and stock markets on the Company or LTI or the Transaction, or as to the impact of the Transaction on the solvency or viability of the Company or LTI or the ability of the Company or LTI to pay their respective obligations when they come due. Our opinion is necessarily based on economic, monetary, market and other conditions as in effect on, and the information made available to us as of, the date hereof and we assume no responsibility for updating, revising or reaffirming this opinion based on circumstances, developments or events occurring after the date hereof. Our opinion is not to be treated as a valuation report of any securities of the Company, LTI or their respective affiliates. We have not evaluated the solvency or fair value of the Company, LTI, or their respective affiliates under the laws of India or any other laws relating to bankruptcy, insolvency or similar matters. We also have assumed that all aspects of the Transaction and any other transaction contemplated in the Scheme will be in compliance with applicable laws and regulations, including in relation to related party transactions, and we have issued this opinion on the understanding that we would not in any manner verify, or be responsible for ensuring, such compliance. We express no opinion and have assumed that the Transaction will not trigger obligations to make open offers under the Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011, and accordingly we have not considered the consequences or impact on the Company, if any such open offers are mandated. We also have assumed that the Transaction will not result in any adverse effect on the Company or its business, whether under tax or other laws or under the terms of any license or approval. The opinion expressed herein is provided solely for the information and assistance of the Board of Directors of the Company in connection with its consideration of the Transaction and such opinion does not constitute a recommendation as to how any holder of Mindtree Equity Shares should vote with respect to the Transaction or any other matter. This opinion has been approved by a fairness committee of Goldman Sachs.

Based upon and subject to the foregoing, it is our opinion that, as of the date hereof, the Exchange Ratio pursuant to the Scheme is fair from a financial point of view to the holders (other than LTI and its subsidiaries) of Mindtree Equity Shares.
